

WHISTLER

Product Information & Data Sheet

Whistler is a natural fieldstone split into the castle rock style. The veneer starts as hand-picked natural fieldstone in irregular shapes. The pieces of stone are fed into the hydraulic press to be split into cleaner rectangular shapes. Only the larger pieces of stone with a flat surface are used to create Whistler. The stone shows an abundance of natural weathering and color variation due to being exposed to the elements for centuries. Although still within the weight tolerance for natural stone veneer, Whistler is a product we cut slightly thicker to ensure beautiful large pieces.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:

We have resources to help with everything from mortar joint selection to a full PDF install guide.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: $\frac{3}{4}$ " - 1 $\frac{1}{2}$ "
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: $\frac{3}{4}$ " - 1 $\frac{1}{2}$ "
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Grey Tones
Style: Castle Rock
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
