

# WINCHESTER

## Product Information & Data Sheet

Winchester is a tumbled ashlar style real stone veneer in shades of tan and earthy brown. This thin stone loosely falls into the ashlar style category due to the linear medium-sized individual pieces, but it can also be considered a strip product due to the consistent heights. Winchester can be installed in an ashlar pattern with mixed heights or more linearly with each course or row of stone using pieces of roughly the same height. This more linear application creates what is referred to as strips of stone across the wall. Winchester is not a sawn height product as the layers of the quarry it is excavated from are naturally consistent.

### Flats Dimensions

Heights: 2" - 8"  
Lengths: 4" - 18"  
Depths: ¾" - 1½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Earthy Browns, Natural Tones  
Style: Ashlar  
Finish: Tumbled

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
