

# BAYSIDE

## Product Information & Data Sheet

Bayside is a natural castle rock or square-rec style real stone veneer. The thin veneer exclusively shows the bedfaces which are the tops and bottoms of the natural stone slabs. Imagine walking across the horizontal surface of a quarry, the surface you are walking on is the bedface that will become the natural stone veneer for your project. The layers of the quarry allow water and minerals to settle on them over time causing the natural grey stone to have shades of tan and occasionally brown. The Bayside quarry is naturally layered in approximately 1" heights allowing this stone to have a split back as opposed to a back sawn with a diamond blade. We pass the production cost savings on to our customers making Bayside one of our more cost-effective premium stone options.

### Flats Dimensions

Heights: 2" - 12"

Lengths: 4" - 18"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

### Stone Characteristics

Colors: Earthy Browns, Grey Tones, Natural Tones

Style: Castle Rock

Finish: Natural

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
