

EAGLE RIVER

Product Information & Data Sheet

Eagle River is a unique ashlar style linear take on natural moss rock. Moss rock is a collective term used to describe the pieces of stone that are on the top of or halfway within the layer of topsoil. The stone is exposed to the elements and weather. Moss rock is unique in that lichen grows on the pieces over time. The raw pieces are collected and sorted by hand. The natural pieces have irregular shapes which we saw on two parallel sides to create a more linear style stone. This becomes the top and bottom of the natural stone veneer and allows the mason to install the pieces in an ashlar pattern.

Note: This stone may have a longer lead time.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
