

BLACK SANDS

Product Information & Data Sheet

Black Sands is a dark mosaic-style real stone veneer. The stone is sought after for its dark, almost black tones. Black Sands is subject to heavy variation and can have greys, earthy browns, and occasional white streaking.

The thin veneer has a split back as Black Sands is produced from the layers of the quarry that are naturally 1" thick. The thicker layers from the quarry are cut with the hydraulic press into our Quincy product. Black Sands can be blended with Quincy to create a cohesive fieldledge style if desired. Black Sands' split back has no impact on the installation or final appearance and allows us to keep our production costs down. We pass the reduced production cost onto you, making Black Sands one of our most affordable premium natural stone veneer options.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 18"
Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 4" - 12"
Lengths: 3"-5" x 6"-12"
Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones
Style: Mosaic
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
