CANTERBURY
Product Information & Data Sheet

Canterbury is a clean-cut dimensional ledgestone veneer intended for a drystack installation. The individual pieces are cut into 2″, 4″, and 6″ heights and fit together tightly when installed with a mortarless application. The ends of the pieces are natural and may require some field trimming by the mason on-site. Canterbury is a splitback product as the stone naturally comes out of the quarry in approximately 1″ sheets. This will have no impact on the installation or final appearance. The full sheets of stone are fed into a gang or multi-blade saw with the blades spaced 2″, 4″, and 6″ apart to cut clean strips in set heights.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:

We have resources to help with everything from mortar joint selection to a full PDF install guide.

Flats Dimensions

Heights: 1″ - 6″
Lengths: 4″ - 12″
Depths: ¾″ - 1-½″
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1″ - 6″
Lengths: 3″-5″ x 8″-12″
Depths: ¾″ - 1-½″
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Dimensional Ledgestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
