

HAWTHORNE

Product Information & Data Sheet

Hawthorne is a natural sandstone thin veneer cut into consistent 12" x 24" panels. The pieces have a natural or split back due to the consistent 1" thick layers of the quarry. The split back will have no impact on the installation or the durability. The sandstone quarry where we produce Hawthorne has two distinct colors due to the varying minerals settling between the layers of stone. We show the product as a blend of gray/blue and brown pieces just as it comes out of the quarry. When ordering you can request a specified ratio of colors depending on your design goals. The color ratio will never be exact as some stones have both colors within the same piece.

Flats Dimensions

Heights: 12"

Lengths: 4" - 16"

Depths: 3/4" - 1-1/2"

Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Copper Tones,
Earthy Browns, Grey Tones,
Sky Tones

Style: Dimensional

Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
