

# CALGARY

## Product Information & Data Sheet

Calgary is a dimensional ledgerstone thin veneer cut from natural granite. The stone is intended to be installed with a drystack, mortarless, or tight-fit installation. The pieces are cut into 2", 4", 6" heights with random lengths. Calgary has soft blue and gray tones with the classic salt and pepper speckles granite is known for. The stone isn't extracted in the traditional sense of quarrying from the ground; to make Calgary large blocks are cut from the side of a cliff made of solid granite. The stone is sawn into smaller blocks of usable sizes which are then split with a hydraulic press and lastly sawed again into the thin veneer. Calgary exclusively shows the splitface or the interior of the natural granite.

### Flats Dimensions

Heights: 2", 4", 6"  
Lengths: 4" - 12"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2", 4", 6"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Grey Tones, Sky Tones  
Style: Dimensional Ledgerstone  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
