

# HELMSDALE

## Product Information & Data Sheet

Helmsdale is a low height ledgerstone style real stone veneer. The pieces of stone have naturally rough textures. Helmsdale is a blend of both the split face and seam face of the natural quartzite. The seam face pieces are the stones in the shades of brown and as the name suggests are exposed to the seams in the quarry allowing rainwater to seep through carrying minerals and coloring the stone. The pieces in the shades of grey are the split face showing the interior and raw quartzite. The stone can be installed with a mortar joint but also looks great with a dry stack (tight fit) installation. Helmsdale is a premium quality natural thin stone veneer imported from overseas. It is in stock and ready to ship.

### Flats Dimensions

Heights: 1" - 5"  
Lengths: 4" - 12"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 1" - 5"  
Lengths: 3"-5" x 6"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Earthy Browns, Gold Tones, Grey  
Tones  
Style: Ledgerstone  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
