

# BRANSON

## Product Information & Data Sheet

Branson is a classic brown and tan castle rock style real stone veneer. The stone gets its earth tones from natural mineral staining between the layers of sandstone. The individual pieces are rectangles of varying sizes.

A hydraulic splitter is used to break or snap the sheets of stone into smaller, usable rectangles. The term snapped comes from the sound the stone makes when split with a hydraulic press. The snapped or broken edge retains the natural look. Blocky pieces like Branson are also referred to as squares and recs. Branson is a premium-quality imported stone. We have 100-square-foot pallets in our warehouse, available and ready to ship.

### Flats Dimensions

Heights: 2" - 12"  
Lengths: 4" - 18"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Stone Characteristics

Colors: Earthy Browns  
Style: Castle Rock  
Finish: Natural

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
