# **EMERALD BAY**

# Product Information & Data Sheet

Emerald Bay is a predominately grey natural stone veneer with subtle green undertones. The thin veneer has a variety of textures that can only be found within natural stone; the textures range from smooth to rippled and rough. What sets Emerald Bay apart is the hints of green in its color. It is important to note the green is not predominant. Green is a rare color in natural stone. This is a natural stone veneer we import from overseas as it is truly unique and there is nothing like it in the United States. The stone is premium quality and cut to the highest standards. We have it in stock and ready to ship today.

We currently have a limited supply of this product. Check with us on availability before ordering. This product will be no longer be available when supply runs out.

### Flats Dimensions

Heights: 2" - 12" Lengths: 4" - 18" Depths: 34" - 1-1/2"
