

COVENTRY

Product Information & Data Sheet

Coventry is a dimensional ledgestone real thin veneer sawed to heights of 2", 4", and 6". With the set heights, this stone is intended to be drystack. Coventry has a unique production process that differs substantially from our other thin stone veneers. The stone is excavated from the ground in roughly 1" thick sheets. The stone sheets are then fed into a gang saw. The term gang saw comes from the saw's multiple blades cutting in unison. The blades are spaced in 2", 4", and 6" increments. A 2' by 2' raw stone sheet will come out of the gang saw in clean and consistent 2", 4", and 6" strips. The gang saw is similar to the head saw used in lumber mills. The production of Coventry is similar to lumber production in that the head saw will create 2" strips of wood from a full tree. This product may have an extended lead time.

Flats Dimensions

Heights: 1" - 6"

Lengths: 4" - 12"

Depths: 3/4" - 1-1/2"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 6"

Lengths: 3"-5" x 8"-12"

Depths: 3/4" - 1-1/2"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones

Style: Dimensional

Ledgestone

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
