

# EBONY RIDGE

## Product Information & Data Sheet

Ebony Ridge is a very dark, predominantly black, castle rock style thin stone veneer. The individual pieces have been split with a hydraulic press on all four sides to create rectangles of varying sizes. Ebony Ridge is a natural or split back product as the backs have not been sawn with a diamond blade. The raw stone is naturally very well layered in the quarry. The 1" thick sheets that are extracted become Ebony Ridge while the thicker layers are processed to produce our Quincy product. The natural back on Ebony Ridge has no impact on installation or final appearance. The lack of sawing reduces our production costs and makes Ebony Ridge one of the most cost-effective dark castle rock stones on the market.

### Flats Dimensions

Heights: 2" - 12"  
Lengths: 4" - 18"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Grey Tones  
Style: Castle Rock  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
