

# HAMPTON

## Product Information & Data Sheet

Hampton is a natural dimensional ledgestone style thin veneer. The individual pieces have been sawed to heights of 2", 4", and 6". The process to create Hampton is quite neat: one-inch-thick sheets of stone are fed through a multi-blade gang or head saw with the blades spaced 2", 4", and 6" apart. Clean and consistent strips of stone come out of the saw and are palletized for shipment. Hampton is a predominantly light grey stone, but it is subject to some variation as the stone can have some hints of tan and light brown. The color variation is due to the natural minerals between the layers of stone in the quarry.

### Flats Dimensions

Heights: 1" - 6"

Lengths: 4" - 12"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 1" - 6"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

### Stone Characteristics

Colors: Earthy Browns, Gold

Tones, Grey Tones

Style: Dimensional

Ledgestone

Finish: Natural

### Packaging

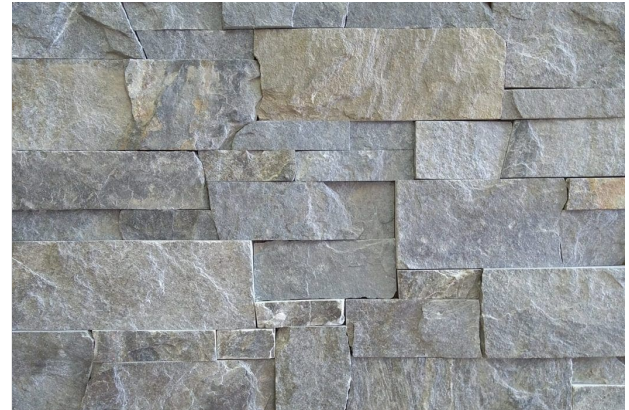

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
