

LANCASTER

Product Information & Data Sheet

Lancaster is a dark charcoal colored natural thin stone veneer with a tumbled finished. This natural limestone has predominantly darker tones with a few lighter gold tones from natural mineral staining. Lancaster has some pretty and subtle horizontal veining created by the layers of the natural rock formation. This thin stone veneer is dimensional cut to specified heights sometimes called course heights. Lancaster has a sawn back and thickness of approximately one-inch. The individual pieces of stone range in length from approximately 4"-16" and weigh 13 pounds per square foot.
