

# LEXINGTON

## Product Information & Data Sheet

Lexington is a natural limestone veneer with a tumbled finish. The stone has a nice variety of colors including grey, buff, tan and some charcoal. Lexington was initially inspired by an architect looking for something "different". The vision was a blend that replicates the look of an old farmhouse; different types of stone pieces that clashed on their own are brought together with a tumbled finish to create a cohesive look. Lexington has some smaller dimensional-like sawn pieces as well some ashlar and mosaic type pieces. The mix allows the mason flexibility and control over the look of the finished wall. This is a great natural stone veneer choice if a flush or overgrout mortar technique are desired.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:

### URL

<https://quarrymill.com/support>

We have resources to help with everything from mortar joint selection to a full PDF install guide.

### Flats Dimensions

Heights: 2" - 10"  
Lengths: 4" - 18"  
Depths: ¾" - 1½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 10"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones  
Style: Fieldledge  
Finish: Tumbled

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
