

RIDGEFIELD

Product Information & Data Sheet

Ridgefield is a classic blend of split face and seam face/weathered edge natural stone veneer. The raw stone slabs used to make Ridgefield are all excavated from the same quarry. The grey pieces are the split face created by breaking the stones with a hydraulic press. The interior part of the stone exposed by the hydraulic press is monochromatic grey due to the lack of mineral staining. The seam face/weathered edge comes from the edges of the natural stone slabs where there were seams within the ground. Rainwater was able to wash in minerals over the years staining the grey stone with shades of brown and tan. Ridgefield pairs the two faces of the stone in a classic blend to create a cohesive and varied product.

Flats Dimensions

Heights: 1" - 5"

Lengths: 4" - 12"

Depths: 3/4" - 1-1/2"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"

Lengths: 3"-5" x 6"-12"

Depths: 3/4" - 1-1/2"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Earthy Browns, Grey Tones

Style: Ledge stone

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
