

SHEFFIELD

Product Information & Data Sheet

Sheffield is a split face natural stone veneer with soft color variation. The thin veneer falls into the ledgestone style with shorter height pieces. Sheffield blends neutral grey tones with darker heavily veined pieces of stone. The raw stone used to create Sheffield comes out of the ground in much smaller slabs than most of our other options due to the natural layering of the quarry. Each quarry has its own unique layering. The layering is as unique as a fingerprint and even changes from one side to the other in some quarries. Typically, the layers are thinnest at the shallow depths and get thicker and larger the deeper you go. Sheffield is extracted exclusively from the top three feet of the quarry to get the smaller pieces and thinnest layers.

Flats Dimensions

Heights: 1" - 5"
Lengths: 4" - 12"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Grey Tones,
Natural Tones
Style: Ledgestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
