

SPRINGFIELD

Product Information & Data Sheet

Springfield is a classic grey castle rock style real stone veneer. The quarry from which Springfield is excavated is unusually well layered. Due to the naturally 1" thick layers of the quarry, the veneer has a split back or natural back. The split back has no impact on the installation or final appearance. We are able to considerably reduce our production cost because we do not have to saw the stone on the back with the diamond blade. The reduced production makes Springfield a cost-effective premium stone option. The stone has semi-consistent shades of grey and can be used on its own or in blends where a grey tone is desired.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Grey Tones
Style: Castle Rock
Finish: Natural

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
