

ASHEVILLE

Product Information & Data Sheet

Asheville is a unique splitface castle rock natural thin stone veneer. The stone showcases earthy brown tones with tans and light copper tones. The texture is relatively smooth due to showing the interior splitface finish.

Asheville is our only castle rock style split-face natural thin stone veneer. Splitface refers to the interior part of the stone that is exposed when the stone is split with a hydraulic press. The machine-cutting process which creates the splitface does not lend itself to the large pieces required for the castle rock style. Typically, the hydraulic press breaks large sheets of quarried stone but with Asheville, smaller pieces of fieldstone are split. This labor-intensive process of the splitting fieldstone involves five splits per piece (four to make the rectangle and one to expose the inner part of the stone).

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Copper Tones, Earthy Browns
Style: Castle Rock
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
