

AURORA

Product Information & Data Sheet

Aurora real stone veneer is a natural East Coast fieldstone. The stone showcases beautiful earthy brown tones. Aurora is a mix of the smaller linear ledge pieces and larger irregular shaped plates of stone. The natural fieldstone has a soft look from years of weathering and environmental exposure. Some pieces of the thin stone may have moss and lichen growth on them.

Aurora is hand-picked from the farm fields of northeastern Pennsylvania and southern New York. As the land was cleared by early settlers, the stone was stacked in rows along property lines. The stone has natural weathering and an old-world appearance reminiscent of stone masonry prior to diamond saws and splitting machines.

Flats Dimensions

Heights: 2" - 10"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 10"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns
Style: Fieldledge
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
