

BRUNSWICK

Product Information & Data Sheet

Brunswick real stone veneer is a low- to medium-height ledgerstone. The stone has colors ranging from dark blue/grey to rust/orange tones. Brunswick is a natural basalt trap rock quarried deep in the hardwood forests of northern Wisconsin.

Trap rock is created by the stacking of successive lava flows that form a distinct stair-step landscape. The cliffs typically associated with trap rock are created by erosion, which removes the surrounding soil and exposes the resilient stone. Brunswick is not quarried in the traditional sense. Due to the nature of trap rock, the stone is pulled from the wall in large vertical columns.

Flats Dimensions

Heights: 1" - 5"
Lengths: 4" - 12"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Grey Tones, Sky Tones
Style: Ledgerstone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
