

CAMDEN

Product Information & Data Sheet

Camden is a beautiful and unique natural granite thin veneer with a weathered or rustic appearance. The stone is a natural fieldstone with unique mineral staining. Fieldstones are more common with limestone and sandstone, but are very rare with granite.

Fieldstones are not quarried in the traditional sense but are hand-collected from the topsoil. As a fieldstone, Camden is naturally weathered from exposure to the elements with beautiful mineral staining from the soil. The weathering gives Camden its characteristic centuries-old appearance. Camden and Narragansett are our only granite fieldstone natural thin veneers.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"

Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones
Style: Castle Rock
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
