

# CAPE COD

## Product Information & Data Sheet

Cape Cod is a real stone veneer in the low-height ledgerstone style. The stone naturally comes in smaller pieces and the top and bottom have not been altered or sawn in any way. Cape Cod shows the weathered edge or seamface of the natural sandstone that is cut from the edges of the sheets of stone as it is quarried. The stone is predominantly brown, however, there are some purples and lighter tones. The stone is shown with a standard half inch raked mortar joint, however, drystacking (mortarless/tight-fit) is also a great option on smaller walls to truly showcase the beauty of the stone.

### Flats Dimensions

Heights: 1" - 5"  
Lengths: 4" - 12"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 1" - 5"  
Lengths: 3"-5" x 6"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Earthy Browns, Grey  
Tones  
Style: Ledgerstone  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
