

# FORRESTVILLE

## Product Information & Data Sheet

Forrestville is a grey dimensional style natural thin limestone veneer. The stone exclusively shows the bedface or tops and bottoms of the natural stone slabs. Forrestville's raw stone is extracted from the ground in very large and consistent sheets that are approximately 4" thick. The sheets are set on a table where they are cut by a large gantry or bridge saw. The computerized blade runs back and forth sawing the sheet of stone into strips that are 2.25", 5", and 7.75" thick. The strips of stone are then split into manageable lengths and fed into the veneer saw. We are able to adjust the heights of this product per customer request.

### Flats Dimensions

Heights: 2-¼", 5", 7-¾"  
Lengths: 4" - 16"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2-¼", 5", 7-¾"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Grey Tones, Natural Tones  
Style: Dimensional  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
