

# FOXBOROUGH

## Product Information & Data Sheet

Foxborough is a bold and beautiful natural granite thin stone veneer. Foxborough's boldness comes from the color variation and movement within the pieces of stone. The natural and clear veining creates the movement within stone. When you take a step back and look at Foxborough, it can appear as if the stone is flowing across the wall. Movement within stone is a sought-after design element and is relatively unique to natural stone. Foxborough is a castle rock style stone or what is aptly called squares and recs on the east coast. The textures of Foxborough vary just much as the colors with the textures ranging from smooth to coarse.

### Flats Dimensions

Heights: 2" - 12"  
Lengths: 4" - 18"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"  
Lengths: 3"-5" x 8"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot
