

GLOUCESTER

Product Information & Data Sheet

Gloucester is a real thin stone veneer cut from natural New England granite. With bright beiges, greys, golds, speckled blacks and darker browns, this stone is rustic and vibrant. The stone is characterized as a castle rock style due to the large rectangular pieces of stone. The individual pieces can range from 4"-12" in height allowing your mason to create a natural looking wall with non-repeating patterns. Gloucester thin stone veneer is most commonly found on large scale exterior projects. The stones will be snapped (a natural and still rustic looking edge created by breaking the stone with a hydraulic press) on all four sides. The castle rock style is almost always installed with a mortar joint between the pieces of stone.

Flats Dimensions

Heights: 2" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones
Style: Castle Rock
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
