

HAVENWOOD

Product Information & Data Sheet

Havenwood is a natural granite thin stone veneer. With pleasing neutral tones, this a great option for a stone that adds subtle elegance. The stones' natural speckles of white, grey, tan, black and brown make it versatile option that complements other siding and roof elements. Havenwood has the rough and rugged texture that can only be achieved with natural granite. The stone is considered a castle rock style due the larger rectangular pieces. The individual pieces can range from 4"-12" in height allowing your mason to create a natural looking wall with non-repeating patterns.
