KENAI
Product Information & Data Sheet

Kenai real stone veneer is a natural basalt in the mosaic style. The stone has predominantly darker grey tones with hints of brown/rust. Kenai's mosaic style takes you back in time to the old logging camps of beautiful northern Wisconsin. Kenai is a trap rock and is not quarried in the traditional sense as the stone is pulled from the wall in large vertical columns. This stone has not been sawn on the back but instead has a split back as the stone naturally breaks in approximately 1" thick layers. Stones like Kenai are sometimes referred to as "natural back". This will have no effect on the installation of the final appearance.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:

We have resources to help with everything from mortar joint selection to a full PDF install guide.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 4" - 12"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Grey Tones, Sky Tones
Style: Mosaic
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
