# **PLYMOUTH**

# Product Information & Data Sheet

Plymouth is a natural blend of tight grained New England granite. The stone consists of soft beiges and greys with a natural and smooth texture. The black speckles within the stone give it a unique marbling that is sometimes referred to as salt and pepper. Plymouth is a castle rock style and characterized by the large rectangular pieces of stone. This style is also called square-rectangular or square-rec for short. The individual pieces can range from 4"-12" in height. The castle rock style is most commonly found on large scale exterior projects. Plymouth thin stone veneer is almost always installed with a mortar joint between the pieces of stone.

#### Flats Dimensions

Heights: 2" - 12" Lengths: 4" - 18" Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

## Stone Characteristics

Colors: Natural Tones Style: Castle Rock Finish: Natural

### Corner Dimensions

Heights: 2" - 8" Lengths: 3"-5" x 8"-12" Depths: 3/4" - 1-1/2"

Weight: 20 lb. per linear foot

Angle: 90

## **Packaging**

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

### **Applications**

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
