

SAGUARO

Product Information & Data Sheet

Saguaro is a colorful earthy blend of hand-picked fieldstone and natural quarried sandstone. Both types of stone that comprise the Saguaro blend have the same composition and are separated only by the depth at which they are collected and quarried. The fieldstones are hand collected from the fields; the pieces of stone have risen through the dirt over time and have been exposed to the elements. The solid sandstone is beneath the dirt in the fields and is quarried below the surface. In mining terms, this process is called removing the overburden to expose the bedrock. The quarried stone has not been exposed to the elements so it has a different color and texture than the fieldstone.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Earthy Browns
Style: Ashlar
Finish: Natural

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
