

SAINT LAWRENCE

Product Information & Data Sheet

Saint Lawrence is an earth tone natural cobblestone veneer. Cobblestone is also referred to as a river rock style or round side out. Saint Lawrence is not quarried in the typical fashion but rather collected from ancient geological deposits. Some of our natural stone veneer products are tumbled manually in a mechanical machine to create a softer appearance. Saint Lawrence on the other hand has been tumbled by nature over thousands of years. You can see nature's tumbling action by viewing and feeling the smooth pieces of stone in a river. The stones are in a constant state of flux rubbing and grinding against each other and eventually becoming round. This is where the term river rock comes from.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 16"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 6"-10"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Grey Tones,
Natural Tones
Style: Cobblestone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
