

SILVERTON

Product Information & Data Sheet

Silverton is a natural weathered fieldstone sourced from farms and country estates. With various colors and both rough and smooth textures this natural stone veneer is well suited for all applications. The stones range from approximately 1"-5" in height and are intended to be installed by a mason in a linear pattern. The individual pieces of stone provide a rustic yet contemporary look. Silverton showcases both the natural interior part of the fieldstone as well as the exterior that has been exposed to the elements for years. The colors range from almost black to off white with some earthy browns and tans mixed in. Silverton can be installed with the standard half inch mortar joint (shown) or the pieces can be drystacked (tight fit installation).

Flats Dimensions

Heights: 1" - 5"
Lengths: 4" - 12"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 1" - 5"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Earthy Browns, Grey Tones
Style: LedgeStone
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
