

# TANTALLON

## Product Information & Data Sheet

Tantallon is a real thin stone veneer with a beautiful and diverse range of colors. The finished product that is Tantallon is a mix of quarried stones and natural fieldstones. Although all the stones are the same in terms of composition and testing, the look of the two stones is quite different. The quarried stones are more consistent with soft tan tones. The fieldstones are the pieces of stone on the surface of the ground that have been exposed to elements for years. The exposure causes the fieldstones to develop their earthy brown tones. Tantallon's blend resembles centuries-old stone work of a time when people used easily accessible stone primarily for structural purposes. Tantallon combines fieldstone for an old-world look with modern quarried stone to create a stunning blend and beautiful natural stone product.

### Flats Dimensions

Heights: 2" - 10"  
Lengths: 4" - 18"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Stone Characteristics

Colors: Earthy Browns, Grey Tones  
Style: Fieldledge  
Finish: Natural

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
