

THOMPSON

Product Information & Data Sheet

Thompson is a quarried sandstone natural thin veneer with gray, brown, gold, and copper tones. The stone falls loosely into the ashlar style with some larger rectangular castle rock-style pieces in the mix.

Geologically, Thompson is the same stone as our Moss Rock product.

Thompson is the quarried stone from the land where our Moss Rock fieldstone is hand-picked. Moss Rock are the pieces of stone that broke off from the solid bedrock over millennia and were pushed up through the soil. We strip the overburden to expose the sandstone bedrock and excavate the stone that makes Thompson. Consider blending Thompson with our squared moss rock product, Spreewald. Note: Thompson may have a longer lead time during certain times of the year.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: $\frac{3}{4}$ " - 1 $\frac{1}{2}$ "
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: $\frac{3}{4}$ " - 1 $\frac{1}{2}$ "
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Copper Tones, Earthy Browns, Gold Tones, Grey Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
