

WESTCHESTER

Product Information & Data Sheet

Westchester is a bold and eye catching natural thin stone veneer. The pieces of thin stone have shades of gold and beige with the signature pattern of grains that can only be found in natural granite. Occasional darker browns and greys are also present in this vibrant natural stone. Westchester has a natural rough texture on most of the pieces, although, a few will be smoother. The individual pieces of thin stone have been cut into larger rectangles to make the castle rock style. The pieces of stone range from .75" to 1.5" in thickness and weigh 13-15 pounds per square foot. Westchester's array of colors truly make a statement.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation
