

# WESTMINSTER

## Product Information & Data Sheet

Westminster is a dark tone natural thin cut limestone veneer. The stone is a mix of dark greys and light blacks with some golds from natural mineral staining. The stone falls loosely into the ashlar category but consists of a mix of ashlar (medium) and castle rock (larger) sized pieces. All of the pieces of limestone have been split with a hydraulic press. Westminster's pieces are primarily rectangular with some irregularity. The raw stone used to create the veneer is quite rough so it does not split as clean and evenly as some of our other stones. The imperfections add character and natural beauty to the finished installation.

### Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: 3/4" - 1 1/2"

Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: 3/4" - 1-1/2"

Weight: 20 lb. per linear foot

Angle: 90

### Stone Characteristics

Colors: Gold Tones, Grey Tones

Style: Ashlar

Finish: Natural

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
