

BISMARCK

Product Information & Data Sheet

Bismarck is a natural thin cut limestone veneer in the ashlar style. This popular stone is a mix of two faces or parts of the limestone quarried in two different locations. By blending stones from multiple quarries, we are able to create beautiful and subtle color variations in Bismarck. Although the stone from both quarries is from the same geological formation, one quarry produces the lighter pieces and the other produces the darker pieces. Using the different faces or parts of the stone also sets this blend apart. Some pieces show the exteriors of the natural limestone slabs while others show the interior which has been split with a hydraulic press.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"

Lengths: 3"-5" x 8"-12"

Depths: ¾" - 1-½"

Weight: 20 lb. per linear foot

Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey

Tones, Natural Tones

Style: Ashlar

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
