

# TRIER

## Product Information & Data Sheet

Trier is a quarried limestone in the natural mosaic pattern. The mosaic style showcases real stone veneer in its most natural state; the edges of the stone have not been split nor sawn. Trier is not a tumbled stone in the standard sense but shows soft signs of natural tumbling that are a result of the quarrying process. As the machines excavate the larger slabs of stone there are smaller pieces that break off. The pieces either fall from the edge of the active quarrying ledge (about four feet) or the operator removes them to get to the next slab. The small irregular fractured pieces of stone are sorted, collected, and sawn into Trier.

### Flats Dimensions

Heights: 4" - 12"  
Lengths: 4" - 18"  
Depths: ¾" - 1-½"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 4" - 12"  
Lengths: 3"-5" x 6"-12"  
Depths: ¾" - 1-½"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones  
Style: Mosaic  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
