

BROOKHAVEN

Product Information & Data Sheet

Brookhaven is a dark and colorful blend of natural limestones. Although dark is a relative term, this natural stone veneer is unusually dark for limestone. The stone looks muted from a distance but is also colorful upon close inspection. There are some lighter tones as well as soft hints of red and lavender.

Brookhaven is a fieldledge style stone. The fieldledge style allows the finished veneer to showcase multiple faces of the limestone, which adds color and texture variations. The rectangular linear pieces primarily show the interior part of the stone, whereas the irregular pieces show the exterior part with natural mineral staining.
