

MARBELLA

Product Information & Data Sheet

Marbella is a beautiful dimensional style natural thin veneer. The veneer falls into the dimensional or sawed height category due to the specified sizes. The standard Marbella contains an even 33% coverage of 6", 8", and 10" heights. The pieces have random lengths and are intended to be installed in set rows for a course height or running bond style. The sizes and ratios of the pieces can be altered per request. Marbella is unbelievably smooth and consistent for a natural stone. It is a split back rather than a sawn back product. This is one of the few products we offer that work as well for flooring as it does on vertical walls.

Note: 90-degree corners are not available for this product. To install corners, your mason will overlap and interlock the flat pieces.

Flats Dimensions

Heights: 2- $\frac{1}{4}$ ", 5", 7- $\frac{3}{4}$ "

Lengths: 4" - 16"

Depths: $\frac{3}{4}$ " - 1- $\frac{1}{2}$ "

Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones

Style: Dimensional

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
