

# VERIA

## Product Information & Data Sheet

Veria is a bold and eye-catching black and white natural stone veneer. The veneer is a blend of two distinct dimensional style cut stones with contrasting colors. Veria was created by our designer in house while working with clients on a luxury modern home. The style was minimalist with a black and white color pallet. The clients requested variation and texture in the natural stone. As with all natural stone, color matching is difficult and never exact. The white in Veria is more of a cream or eggshell color and the black is a dark charcoal tone. This is how the colors exist in nature and creates the beauty found in natural stone. The stark contrast between the stones in this blend makes a bold statement. Veria is a fantastic choice for modern and minimalist design.
