

BIG HORN

Product Information & Data Sheet

Big Horn is an ashlar style real stone veneer in grey and natural tones. The stone is set apart by its depth of color with multiple colors within the individual pieces. The natural depth of color is so incredible and pronounced some of the pieces almost appear as if they had paint splattered on them.

From a distance Big Horn will have a neutral and almost monochromatic look, however, upon closer inspection, the greys, whites, and variation come to life. Big Horn is extracted from a well-layered quarry which gives the finished stone its straight and consistent pieces.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Ashlar
Finish: Natural

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
