

# SHERMAN

## Product Information & Data Sheet

Sherman is a rough castle rock style natural thin stone veneer. The stone has a great depth of color within the individual pieces and a range of colors between the pieces. Sherman is one of the few natural stone veneers where we ask our customers for color specifications of lighter or darker tones. You may notice this variation in stone color in our application photos. Sherman is a natural back stone; the quarry is naturally layered in approximately 1" increments and the stone does not need to be sawn into thin veneer. The lack of sawing in production makes Sherman a very affordable premium option. The natural back has no impact on the installation nor final appearance. Corners are not available as the raw stone is naturally only 1" thick.

### Flats Dimensions

Heights: 2" - 12"

Lengths: 4" - 18"

Depths: ¾" - 1-½"

Weight: 13 - 15 lb. per square foot

### Stone Characteristics

Colors: Earthy Browns, Gold Tones, Grey Tones, Natural Tones

Style: Castle Rock

Finish: Natural

### Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

### LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

### Installation

Natural thin stone veneer installation information is available on our website:
