

SUMPTER

Product Information & Data Sheet

Sumpter is a colorful ashlar style natural thin stone veneer. The stone has semi-rare warm copper tones along with earthy brown tones and lighter tan tones. Sumpter is one of our more affordable premium natural stone veneers due to its natural or split back. The pieces have not been sawn on the back with a diamond blade as the quarry the stone is extracted from is naturally layered in 1" increments. Large 1" thick sheets of stone are fed into the hydraulic press where they are snapped into the strips that form Sumpter. With the naturally thin pieces, 90-degree corners are not available. On the corners, overlap and interlock the flats.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: 3/4" - 1 1/2"

Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Copper Tones,
Earthy Browns, Gold Tones

Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
