

CATSKILL

Product Information & Data Sheet

Catskill is a neutral blend of split face stone from two neighboring quarries. The natural thin stone veneer has subtle color variation between the greys and whites with a beautiful cohesive finished look once installed. One quarry provides the lighter monochromatic greys and the other quarry brings the darker pieces with beautiful graining. We show the stone with a standard grey mortar for consistency; however, some designers and architects prefer a white or lime tone mortar with this product. Adjusting the mortar color is something that should be done cautiously as it can take away from the natural beauty of the stone. Catskill lends itself to lighter mortar as it makes the pieces stand out.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones, Natural Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
