

FAIRFAX

Product Information & Data Sheet

Fairfax is a tan and light brown real stone veneer. The stone has some soft copper tones making it a natural choice to complement log siding, rustic wood accents, or hardwood flooring. The stone pairs nicely with stained cedar, hickory, or maple which pull the colors from Fairfax to create a cohesive design. Fairfax is a split back product that is approximately 1.25" thick. It has not been sawn with a diamond blade. The natural back has no impact on the installation or finished look. The raw stone is naturally layered at the perfect thickness for thin veneer allowing us to skip the sawing process and additional production. Fairfax is one of our most cost-effective natural thin stone veneers.

Flats Dimensions

Heights: 2" - 8"

Lengths: 4" - 18"

Depths: ¾" - 1½"

Weight: 13 - 15 lb. per square foot

Stone Characteristics

Colors: Copper Tones, Earthy Browns

Style: Ashlar

Finish: Natural

Packaging

Sold as loose pieces.

Flat Pallet: 150 square feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
