

BEAVER CREEK

Product Information & Data Sheet

Beaver Creek is a mosaic style natural dolomitic limestone thin veneer. The stone showcases 100% irregular pieces cut from the bedfaces of the limestone slabs. The bedfaces are the flat tops and bottoms of the sheets that are extracted from a shelf rock quarry. Beaver Creek shows color variation that comes from rainwater seeping into the ground between the stones. The rainwater carries minerals that stain the stone over time, creating the elegant gold, gray, and natural tones.

Beaver Creek has natural faces and edges that have not been split or sawn. The mosaic style stone is completely unaltered except for being sawn to 1" thick thin veneer on the back.

Flats Dimensions

Heights: 4" - 12"
Lengths: 4" - 18"
Depths: ¾" - 1-½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 4" - 12"
Lengths: 3"-5" x 6"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Gold Tones, Grey Tones, Natural Tones
Style: Mosaic
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
