

# PEMBROKE

## Product Information & Data Sheet

Pembroke is a striking natural granite thin stone veneer. The individual pieces have a great deal of natural veining. The veining gives the appearance that the stones are flowing; this is called movement within the stone in the design industry. Pembroke is primarily dark blue and grey with hints of black and white. Large blocks of granite are unearthed from the quarry to create Pembroke. The blocks are sawn into sheets with thicknesses of 2.25", 5", and 7.75". The clean and consistent sheets are fed into the splitter to be broken into pieces that are sawn into thin veneer. With this type of processing, Pembroke is considered a split face product. It showcases the interior part of the natural granite.

### Flats Dimensions

Heights: 2-1/4", 5", 7-3/4"  
Lengths: 4" - 16"  
Depths: 3/4" - 1-1/2"  
Weight: 13 - 15 lb. per square foot

### Corner Dimensions

Heights: 2-1/4", 5", 7-3/4"  
Lengths: 3"-5" x 8"-12"  
Depths: 3/4" - 1-1/2"  
Weight: 20 lb. per linear foot  
Angle: 90

### Stone Characteristics

Colors: Grey Tones, Sky Tones  
Style: Dimensional  
Finish: Natural

### Packaging

Sold as loose pieces.  
Flat Pallet: 150 square feet  
Corner Pallet: 50 linear feet

### Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.
