

JODECO

Product Information & Data Sheet

Jodeco is an ashlar style natural thin cut limestone veneer that showcases beautiful veining. The stone is incredibly complex and shows more natural veining than any other veneer we offer. The horizontal veining comes from the unique layering of the limestone quarry. Jodeco shows exclusively the splitface or interior part of the stone. The interior part of the stone is exposed to the elements for the first time; this is one of the very few natural stone veneers we offer that will fade if not sealed. The new exposure will fade the stone to a lighter grey tone. This has no impact on the integrity of the stone. To keep the beautiful darker tones and pronounced veining, a dry look sealer can be easily applied after installation.

Flats Dimensions

Heights: 2" - 8"
Lengths: 4" - 18"
Depths: ¾" - 1½"
Weight: 13 - 15 lb. per square foot

Corner Dimensions

Heights: 2" - 8"
Lengths: 3"-5" x 8"-12"
Depths: ¾" - 1-½"
Weight: 20 lb. per linear foot
Angle: 90

Stone Characteristics

Colors: Grey Tones
Style: Ashlar
Finish: Natural

Packaging

Sold as loose pieces.
Flat Pallet: 150 square feet
Corner Pallet: 50 linear feet

Applications

This natural stone veneer is approved for all applications due to its high compressive strength and low water absorption. It is well suited for exterior applications with a harsh climate.

Natural stone varies in color, shape and veining from piece to piece. Photos used are meant to be as accurate as possible in depicting the product. Photos of stone are meant to give a general idea but should not be used for exact color matching.

LEED® Certification & Energy Efficiency

Using natural stone veneer can contribute to obtaining credits toward your LEED green building certification. The natural material helps improve the energy efficiency of your home or business.

Installation

Natural thin stone veneer installation information is available on our website:
